

## **ExaProtect Joins Juniper Networks J-Partner Solution Alliances Program**

*Companies Partner to Deliver Advanced, Interoperable Network Security Management Solutions*

**11 April 2007** -- ExaProtect, a leader in intelligent security management, has announced that it has joined the Juniper Networks J-Partner Solutions Alliance Program. This technology alliance enables interoperability between Juniper Networks' security solutions and ExaProtect's security event and policy change management solutions, to help customers effectively assess, manage and mitigate the exposure to risks for their company and secure their network investments.

ExaProtect's Security Management Solution and Network Security Policy Solution combined with Juniper Networks' firewall/VPN, Unified Access Control and Intrusion Detection and Prevention solutions, offers customers scalable and comprehensive security monitoring for complex, diverse IT infrastructures.

The solutions also offer multi-vendor security configuration and policy management, which enables IT administrators to design, implement and track security policies and change management on all network devices from a single interface.

"The interoperability between ExaProtect and Juniper Networks' security solutions gives enterprises greater choice, by enabling them to simplify and streamline their security management. Our 'View & Do' approach puts IT staff in control of network security, making policy and configuration changes easier while reducing both risk and complexity," said Frédéric Saint-Joigny, ExaProtect's VP of Strategic Alliances.

"Managing security data from multi-vendor networks is a challenge for all organizations," said Domenic Perri, senior manager, Business Development at Juniper Networks. "We are excited that ExaProtect has joined Juniper Networks J-Partner program as this partnership will help enterprise customers reduce security management costs and improve their overall security posture."

### **About the Juniper J-Partner Solution Alliances Program**

Juniper Networks transforms the business of networking by creating competitive advantage for our customers with the most sophisticated networking and security solutions in the industry. The J-Partner Solution Alliance program enables next-generation networking and security solutions, providing organizations with integrated and interoperable best-in-breed solutions. The solution categories include: Infrastructure, Security, OSS and Network Management, Applications, Content and Media, and Managed Services. For more information on joining the J-Partner Solutions Alliances program, please visit <http://www.juniper.net/partners/>.

### **About ExaProtect – intelligent security management**

ExaProtect is a unique global player in the information security marketplace, offering a complete start-to-finish security management solution. Its powerful, integrated 'View & Do' approach is of great benefit to its 300+ existing customers, who include many Fortune 500 enterprises, international telecommunications companies and government organizations.

ExaProtect technology empowers users to meet the increasing demand for unified control of multi-vendor network and security systems, whether their goal is to raise information security levels, demonstrate compliance, or simply improve operational efficiency.

ExaProtect's US headquarters is located in Mountain View, California, and EMEA headquarters located in Paris, France. ExaProtect offers global support with seven offices worldwide. For more information and how to contact us locally, visit: [www.exaprotect.com](http://www.exaprotect.com)
