

ExaProtect Positioned in Leading Industry Analyst Firm's 2007 Magic Quadrant for Security Information & Event Management

15 May, 2007 – ExaProtect, a leader in intelligent security management, has been positioned by Gartner, Inc. in its Magic Quadrant for Security Information & Event Management (SIEM) report, 2007.

Gartner vice president and distinguished analyst Mark Nicolett and Kelly M. Kavanagh, principal research analyst evaluated vendors in the SIEM sector based on their ability to execute and the completeness of their vision. Gartner is a research and advisory firm that helps more than 60,000 clients worldwide understand technology and drive business growth.

Gartner evaluated vendors against holistic criteria that included the company's vision, execution, market understanding, sales strategy, innovation, business model, market responsiveness, track record, and customer service experience.

Jean-François Déchant, CEO of ExaProtect said, "We are delighted to be placed on Gartner's Magic Quadrant for SIEM. Our appliance-based products blend SEM (security event management) and SIM (security information management) functions, and integrate with network device management. We believe this 'View and Do' approach is unique in simplifying security management while giving finer control. No other vendor offers a single solution to meet the growing demand for holistic security management."

ExaProtect's Security Management Solution (SMS) and Network Security Policy Solutions (NSPS) solutions simplify overall security management for organisations, optimise threat response and maximise return on security investments. SMS gives true SIEM capabilities, while NSPS provides security policy change management and real-time remediation. The company has already previewed an appliance product running both solutions, delivering an integrated 'View and Do' solution.

The Magic Quadrant is copyrighted 2007 by Gartner, Inc. and is reused with permission. The Magic Quadrant is a graphical representation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant, and does not advise technology users to select only those

vendors placed in the "Leaders" quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.
